Career Objective

Hello there! I recently finished my studies, and I graduate in April 2021. I'm aspiring towards a career that allows me to express my passion and creativity towards programming.

To find out more about me and view all my projects: https://asuerte.github.io/

My github: https://github.com/asuerte

Technical skills

- Programming languages and frameworks: C, C#, C++, Java, .NET, HTML, CSS, JavaScript, PHP, Bootstrap, jQuery, Node.js, Express.js, EJS, Swift, ASP.NET Core, VBScript
- Databases: MySQL, MS SQL Server, SQLite, MS Access
- Operating Systems: Windows, UNIX, Linux, Android, iOS

Experience

- Junior Web/Application Developer, Gramline   November 2020 - February 2021
  - Responsible for implementing new features into the Gram website through ASP.NET. This included redesigning forms and tables, using APIs to display forms in a PDF, retrieving values from the database to display information, inserting new records into the database. (Tools: C#, JavaScript, jQuery, HTML, CSS, SSMS, Ajax, ASP.NET)
  - Developed a WinForm that allows a new customer to fill in their company and personal details. Implemented functionality for the supervisor to login and view each pending and approved customer record stored in the database. (Tools: C#, SSMS)
  - Developed an android application that allows staff to login and pick items for a particular invoice. The customer can digitally sign the invoice, after all the items for that invoice are picked. (Tools: Java, XML, SQLite, SSMS)

Education and Training

- Western Sydney University   March 2017 – April 2021
  - Bachelor of Computer Science, Major in Systems Programming
  - Recipient of 2018 Dean's Merit List
